

Sophos Managed Risk

Powered by  **tenable**

Reduce Cyber Risk With Proactive Attack Surface Management

Sophos Managed Risk is a vulnerability and external attack surface management service powered by industry-leading Tenable technology and delivered by Sophos threat exposure and remediation experts. Sophos analysts identify high-priority cybersecurity vulnerabilities and potential attack vectors in your environment so action can be taken to prevent attacks before they disrupt your business.

Attack Surface Visibility

The modern attack surface continues to grow beyond the borders of traditional IT, and most organizations now have internet-facing assets they don't realize they own, providing easy targets for threat actors.

Sophos Managed Risk discovers your internet-facing assets and analyzes your external attack surface.

Continuous Risk Monitoring

Does your in-house team have deep knowledge and experience of vulnerabilities and the exploitation landscape to fully understand the security posture of your attack surface?

Sophos Managed Risk provides expert guidance and helps set remediation priorities for your business.

Prioritize Vulnerabilities

New vulnerabilities are discovered faster than most organizations can fix them. Understanding which vulnerabilities are relevant and in which order to fix them is a significant challenge.

Sophos Managed Risk identifies and prioritizes exposures using extensive vulnerability coverage and risk-based prioritization.

Identify New Risks Fast

Attackers look for weaknesses in your environment long before you know they're there. Identifying high-risk exposures quickly is crucial.

Sophos Managed Risk proactively notifies your team when new critical vulnerabilities are discovered that affect your assets.

Highlights

- ▶ Comprehensive external attack surface visibility and vulnerability management in a single unified offering
- ▶ A fully managed service delivered by Sophos experts
- ▶ Collaborates with Sophos MDR - the industry's leading Managed Detection and Response service
- ▶ Leverages superior exposure management technology from Tenable

Key Features

External Attack Surface Management

Sophos Managed Risk discovers your internet-facing assets and systems including web and email servers, web applications, and public-facing API servers, and associated exposures that could be exploited by adversaries.

Risk-based Vulnerability Assessment

Superior vulnerability coverage and AI-powered prioritization enable your IT and security teams to focus their time on vulnerabilities that are most likely to be exploited.

Continuous Monitoring

Regular automated scans enable you to keep pace with your ever-increasing attack surface. Sophos Managed Risk also performs scans on your behalf when new exploits are discovered and when the risk level of a known vulnerability changes.

Comprehensive Reporting

Detailed attack surface and vulnerability reports are available in your Sophos console, enabling you to stay informed and gain a better understanding of your organization's digital footprint and associated risks.

Proactive Notification

When a new critical vulnerability is discovered that affects your assets, Sophos Managed Risk proactively notifies you and investigates the threat on your behalf.

Collaborates with Sophos MDR

Sophos Managed Risk works seamlessly with the industry's leading Managed Detection and Response service.

A Managed Service Delivered by Vulnerability Experts

Free up resource-stretched IT and security teams to focus on business enablement and leverage superior security outcomes delivered as a service. Sophos Managed Risk is a fully managed service delivered by a dedicated team of Sophos experts, including Tenable-certified vulnerability analysts.

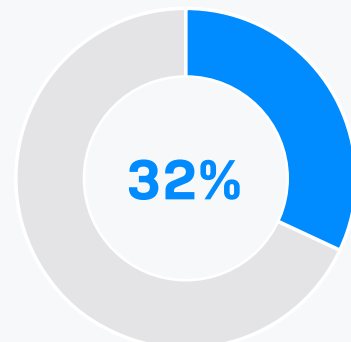

The Sophos Managed Risk team works with you to understand your environment and educate your team. We provide guidance on the current exploitation landscape, review findings from your environment, and discuss recommended remediation actions and priorities.

Collaborates with Sophos MDR

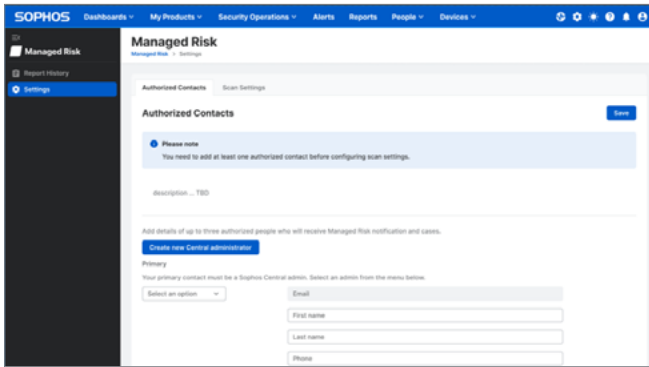

Sophos Managed Risk works seamlessly with the Sophos Managed Detection and Response (MDR) service. When Sophos discovers a new high-risk zero-day vulnerability that could leave you exposed, Sophos Managed Risk scans your assets for the possibility of an exploit. Connect with the Sophos Managed Risk team and conveniently manage cases alongside other MDR investigations in one unified Sophos console.

Quick and easy onboarding

Comprehensive reporting

Schedule attack surface and vulnerability scans

Collaborates with Sophos MDR

Powered by Tenable Technology

Sophos Managed Risk is powered by Tenable, the industry leader in exposure management. The service leverages Tenable's market-leading products powered by Tenable research to provide attack surface discovery, vulnerability coverage, and AI-powered risk-based prioritization technology to analyze your external threats.

Simple Licensing

Sophos Managed Risk is available as an add-on for the Sophos Managed Detection and Response (MDR) service. Predictable subscription-based pricing is based on the number of users and server devices in your organization.

Service Onboarding

Getting started with the Sophos Managed Risk service is straightforward. And for external attack surface management, there's no software to deploy in your own environment.

Day 1 – Onboarding

In your Sophos management console, our onboarding wizard will guide you through the simple steps to provide your authorized contacts, details of your organization's domains, and schedule your automated scans.

Day 30 – Baseline Review

Starting with a mutual understanding is essential. An initial baseline review meeting enables the Sophos Managed Risk team to understand what's important to your organization and review the results of your first vulnerability scans.

Quarterly Reviews

Scheduled meetings with the Sophos Managed Risk team enable you to review recent findings, learn about the current exploitation landscape, and discuss Sophos' recommendations and remediation priorities.

What's Included?

	Sophos Managed Risk
Fully managed service, delivered by Sophos experts	✓
External attack surface discovery, categorization and reporting	✓
Risk-based prioritization of vulnerabilities	✓
Proactive notification of critical exposures	✓
Automated attack surface monitoring and vulnerability scans	✓
Scheduled reviews with the Sophos Managed Risk team	✓
A dedicated team of vulnerability experts on-hand when you need them	✓
Collaborates with the Sophos Managed Detection and Response (MDR) service	✓

See why over 20,000 organizations choose Sophos Managed Security Services

Sophos is recognized as a Customers' Choice for Managed Detection and Response Services with an average 4.8/5 customer rating.

Sophos is the only vendor named a Leader in EPP, EDR, MDR, XDR, and Firewall in the G2 Winter 2024 Reports.

Sophos is named a Representative Vendor in the Gartner® Market Guide for Managed Detection and Response Services.

Sophos MDR delivered exceptional results in the first-ever MITRE ATT&CK® Evaluation for Security Services Providers.
